## Payment

You must remit payment in accordance with the FedEx Service Guide, tariff, service agreement or other terms or instructions provided to you by FedEx from time to time. You may not withhold payment on any shipments because of equipment failure or for the failure of FedEx to repair or replace any equipment.

## Inaccurate Invoices

If you generate an inaccurate invoice, FedEx<sup>®</sup> may bill or refund to you the difference according to the *FedEx Service Guide*, tariff service agreement or other terms or instructions provided to you by FedEx from time to time. A request for refund on a FedEx shipment must be made in accordance with the applicable Service Guide or terms or instructions provided by FedEx from time to time. A shipment given to FedEx with incorrect information is not eligible for refund under any FedEx money-back guarantee. FedEx may suspend any applicable money-back guarantee in the event of equipment failure or if it becomes inoperative.

## Confidential and Proprietary

The information contained in this guide is confidential and proprietary to FedEx Corporate Services, Inc. and its affiliates (collectively "FedEx"). No part of this guide may be distributed or disclosed in any form to any third party without written permission of FedEx. This guide is provided to you and its use is subject to the terms and conditions of the FedEx Automation Agreement. The information in this document may be changed at any time without notice. Any conflict between this guide, the FedEx Automation Agreement and the *FedEx Service Guide* shall be governed by the FedEx Automation Agreement and the *FedEx Service Guide*, in that order.

## Disclaimer

All Improper Transaction scenarios are for example only. They do not reflect all error condition scenarios.

## About This Guide

This guide describes how to integrate with FedEx Web Services.

It is written for the application developer who uses web services to design and deploy applications enabled by FedEx. It describes how to get started with application development and how to use the Application Programming Interface (API). It also describes each available service in addition to the business logic that drives each FedEx process.

## Document Organization

Each web service provides access to FedEx features. The service description includes service details and a full schema listing to facilitate application development.

## Support

- Contact FedEx Web Services technical support at [websupport@fedex.com](mailto:websupport@fedex.com).
- Regional contact email addresses are:
  - EMEA - [emeawebservices@fedex.com](mailto:emeawebservices@fedex.com)
  - APAC - [apacwebservices@fedex.com](mailto:apacwebservices@fedex.com)
- For technical support, call 1.877.339.2774 and state "API" at the voice prompt.
- Support hours are Monday through Friday, 7:00 a.m. to 9:00 p.m. CST, and Saturday, 9:00 a.m. to 3:00 p.m. CST.
- For FedEx Customer Service, call 1.800.GoFedEx 1.800.463.3339.
- Customers using a FedEx® Compatible Solutions Program automation solution should contact their software provider for support.

# 1. Introduction

FedEx Web Services gives you the tools to build custom platform- and interface-independent applications that access FedEx features. You can use FedEx Web Services in a variety of ways to create customized integration solutions for your specific shipping needs. Here are just a few of the ways a company can use web services to streamline operations, improve visibility, and provide more choices to clients:

- **Give Customers More Options:** Help customers learn about all the available shipping options and rates with Ship Service WSDL, OpenShip WSDL, and Rate Services WSDL. You can also extend this service to your shopping cart and website, allowing customers to access money-saving information firsthand.
- **More Convenience:** Use the Locations Service WSDL to find the FedEx pickup location nearest your customer. Or, send an email to your customers with a link to this service as part of your standard order-receipt process.
- **Offer Global Shipping Options:** Create shipping labels for worldwide locations. Improve customer service by offering more shipping options to customers in more countries with the consolidated Ship Service WSDL.
- **Reduce Customer Service Costs:** Decrease phone traffic from customers checking the status of their shipments and cut customer service costs. FedEx provides online Tracking and Visibility Services that allow you to provide customers with the status of shipments, Signature Proof of Delivery (SPOD), and Shipment Notification in the Ship Request.
- **Simplify Processes and Improve Satisfaction:** In addition to ExpressTagAvailability, provide a simple way to allow customers to return an order with Email Labels. This service sends an email with the address (URL) of a website where the recipient can log in and print a return label.

Why should developers be interested in web services?

- **Interoperability:** Any web service can interact with any other web service and can be written in any programming language.
- **Ubiquity:** Web services communicate using HTTP and XML. Any connected device that supports these technologies can both host and access web services.
- **Low Barrier to Entry:** The concepts behind web services are easy to understand, and developers can quickly create and deploy them using many toolkits available on the web.
- **Industry Support:** Major content providers and vendors support the web services movement.

Any application running on any platform can interact with a web service by using the Simple Object Access Protocol (SOAP) and Web Services Description Language (WSDL) standards for message transfer and service discovery. By following the standards, applications can seamlessly communicate with platform services.

## 1.1 Document Overview

This guide provides instructions for coding the functions you need to develop FedEx supported applications. The following chapters make up this guide:

- Introduction (this chapter):
  - Documentation overview and guidelines, including how to use the Help application and how to print this guide.
  - Overview information about web services, including a high-level description of FedEx Web Services methods.
  - Coding basics.
  - Overview information about testing and certifying your application.

Each chapter covering FedEx Web Services coding includes:

- Service Details: Business rules for using the FedEx service.
- Service Options: Links to additional services that can be added to the basic web service.

- Coding Details: Best practices information, basic request and reply elements, and a link to error messages.
- XML Schema: A link to the layout for the service. This layout provides coding requirements for all elements in the schema.

## 1.2 Printing All or Part of This Guide

You can print all or part of this guide from the PDF version.

### 1.2.1 Printing from the PDF Version

From the PDF version you can print the complete document or a page range of the document.

- 1) Open the PDF file and click the printer icon or click **File > Print**.
- 2) From the **Print** dialog box, print the complete document, specify a page range, or choose from any of the available print options.

## 1.3 Web Services, WSDL, and SOAP Overview

This section describes the standard coding technologies used in FedEx Web Services.

### 1.3.1 Web Services

Web services are a collection of programming technologies, including XML, Web Services Description Language (WSDL), and SOAP, which allow you to build programming solutions for specific messaging and application integration.

Web services are, by definition, platform independent. FedEx Web Services allow developers to build custom applications that are independent of changes to the FedEx interface.

Web Services are consumed by many different applications across many platforms. It is based on the basic principles that govern XML standards, one of which is how Namespaces can be declared and applied.

Namespaces are declared as an attribute of an element. It is not mandatory to declare namespaces only at the root element; rather it could be declared at any element in the XML document. The scope of a declared namespace begins at the element where it is declared and applies to the entire content of that element, unless overridden by another namespace declaration with the same prefix name, the content of an element is the content between the <opening-tag> and </closing-tag> of that element. So essentially, XML namespace declarations are scoped, meaning that the declared prefix (or default namespace) is in force for the element on which the declaration occurs (as well as its descendant elements). A namespace declared as follows:

```
<v12:RateReply xmlns:v12="http://
is semantically same as
<RateReply xmlns="http://fedex.com/ws/rate/v12">
or even (hypothetically) same as
<foo:RateReply xmlns:foo="http://fedex.com/ws/rate/v12">
```

### 1.3.2 WSDL

A SOAP request to, or response from, a service is generated according to the service's WSDL definition. A WSDL document describes a service. It is an XML document that provides information about what the service does, the methods that are available, their parameters, and parameter types. It describes how to communicate with the service in order to generate a request to, or decipher a response from, the service.

The purpose of a WSDL is to completely describe a web service to a client. A WSDL defines where the service is available and what communications protocol is used to talk to the service. It defines everything required to write a program to work with an XML web service. A WSDL document describes a web service using seven major elements. Elements can be abstract or concrete.

Abstract XML elements describe the web service: <types>, <message>, <operation>, <portType>. Concrete XML elements provide connection details: <service>, <port>, <binding>.

### 1.3.2.1 WSDL Elements

Table 1. WSDL Elements

Element	Definition
<definitions>	The root element contains name space definitions.
<portType>	The most important WSDL element. It is a set of all operations that a web service can accept and is a container for <operation> elements. This WSDL element describes a web service, the operations that can be performed, and the messages that are involved, and can be compared to a function library (or a module or a class) in a traditional programming language.
<types>	Defines variable types used in the web service (both the parameters passed to a function and the type of the value passed back via the response). The data types are described by XML schema. This element contains user-defined data types (in the form of XML schema). For maximum platform neutrality, WSDL uses XML schema syntax to define data types.
<message>	Defines the data elements of an operation. Each message can consist of one or more parts that can be compared to the parameters of a function call in a traditional programming language.
<operation>	Child of the <binding> element that defines each operation that the port exposes. This element allows only three messages: Message - Definition Input Message - Data web services receive Output Message - Data web services send Fault Message - Error messages from web services
<service>	Contains a <port> child element that describes the URL where the service is located. This is the location of the ultimate web service.
<binding>	Defines the message format and protocol details for each port. The binding element has two attributes: the name attribute and the type attribute. This element specifies how the client and the web service should send messages to one another.

*Note: For more information about the WSDL standard, refer to the World Wide Web Consortium (W3C) Website at [w3.org/TR/wsdl](http://w3.org/TR/wsdl)*

### 1.3.3 SOAP

- Is a simple XML-based protocol that allows applications to exchange information over HTTP.
- Is built on open standards supported by numerous development tools on various platforms.
- Is a request interface object in your application programming language.
- Provides a way to communicate between applications running on different operating systems, with different technologies and programming languages.
- Enables the data to pass through layers of intermediaries and arrive at the ultimate receiver the way it was intended.

*Note: You may not need to actually construct the SOAP messages yourself – many development tools available today construct SOAP behind the scenes.*

### 1.3.3.1 SOAP Message

A SOAP message is an XML document that can be a request for a web service from a client or a “reply” from a web service to a client.

- Required <SOAP:Envelope>
- Optional <SOAP:Header>
- Required <SOAP:Body>

#### 1.3.3.1.1 Example: Delete Tag Request (SOAP Message)

```
<SOAP-ENV:Envelope
  xmlns:SOAP-ENV="http://schemas.xmlsoap.org/soap/envelope/"
  xmlns:SOAP-ENC="http://schemas.xmlsoap.org/soap/encoding/"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
  xmlns:xsd="http://www.w3.org/2001/XMLSchema"
  xmlns="http://fedex.com/ws/ship/v13">
  <SOAP-ENV:Body>
    <DeleteTagRequest>
      <WebAuthenticationDetail>
        <UserCredential>
          <Key>
            User Key
          </Key>
          <Password>
            User Password
          </Password>
        </UserCredential>
      </WebAuthenticationDetail>
      <Client detail>
        <AccountNumber>xxxxxxxx</Account      number>
        <MeterNumber>xxxxxxx</MeterNumber>
      </ClientDetail>
      <Version>
        <ServiceId>ship</ServiceId>
        <Major>12</Major>
        <Intermediate>0</Intermediate>
        <Minor>0</Minor>
      </Version>
      <DispatchLocationId>MQYA</DispatchLocationId>
      <DispatchDate>2012-06-01</DispatchDate>
      <Payment>
        <PaymentType>shipper</PaymentType>
        <Payor>
          <AccountNumber>xxxxxxxx</AccountNumber>
          <CountryCode>US</CountryCode>
        </Payor>
      </Payment>
      <ConfirmationNumber>997037200019454</ConfirmationNumber>
    </DeleteTagRequest>
  </SOAP-ENV:Body>
</SOAP-ENV:Envelope>
```

### 1.3.4 Non-SOAP Web Services

FedEx offers a non-SOAP web services solution that you can use to send transactions without having to use tools that provide SOAP protocol support for web services. This may be convenient for developers using environments that do not provide support for SOAP. With this interface, XML documents are sent directly to the FedEx servers via the HTTP POST command. FedEx provides a set of specifications and examples to help with the development of this type of communications method.

To use the non-SOAP web service solution, you must have a working knowledge of HTTPS and Secure Socket Layering (SSL) encryption, the ability to provide a secure SSL connection to FedEx and the ability to code to an

operation interface using XML.

The interfaces used in the SOAP and non-SOAP web services are defined in WSDL files. The WSDL files contain schemas that define the layout of the operations. The same WSDL file is used for both the SOAP and non-SOAP web service users.

Non-SOAP users are concerned only with the schema definitions and not the other WSDL components that are SOAP-specific. The XML data that is sent via the non-SOAP interface looks almost identical to the data that is sent via the SOAP interface. The only difference is that the data sent via the non-SOAP interface does not contain the wrapping Envelope and Body tags that are specific to SOAP. The following is an example of a TrackRequest using the non-SOAP interface.

### 1.3.4.1 Example Track Request

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:v9="http://fedex.com/ws/track/v9">
  <soapenv:Header/>
  <soapenv:Body>
    <v9:TrackRequest>
      <v9:WebAuthenticationDetail>
        <v9:UserCredential>
          <v9:Key>xxxxxx</v9:Key>
          <v9:Password/>
        </v9:UserCredential>
      </v9:WebAuthenticationDetail>
      <v9:ClientDetail>
        <v9:AccountNumber>XXXX</v9:AccountNumber>
        <v9:MeterNumber>XXXX</v9:MeterNumber>
        <v9:Localization>
          <v9:LanguageCode>EN</v9:LanguageCode>
          <v9:LocaleCode>US</v9:LocaleCode>
        </v9:Localization>
      </v9:ClientDetail>
      <v9:TransactionDetail>
        <v9:CustomerTransactionId>Track By Number_v9</v9:CustomerTransactionId>
        <v9:Localization>
          <v9:LanguageCode>EN</v9:LanguageCode>
          <v9:LocaleCode>US</v9:LocaleCode>
        </v9:Localization>
      </v9:TransactionDetail>
      <v9:Version>
        <v9:ServiceId>trck</v9:ServiceId>
        <v9:Major>9</v9:Major>
        <v9:Intermediate>1</v9:Intermediate>
        <v9:Minor>0</v9:Minor>
      </v9:Version>
      <v9:SelectionDetails>
        <v9:CarrierCode>FDXE</v9:CarrierCode>
        <v9:PackageIdentifier>
          <v9:Type>TRACKING_NUMBER_OR_DOORTAG</v9:Type>
          <v9:Value>XXXX</v9:Value>
        </v9:PackageIdentifier>
        <v9:ShipmentAccountNumber/>
        <v9:SecureSpodAccount/>
        <v9:Destination>
          <v9:StreetLines>Address_Line</v9:StreetLines>
          <v9:City>City</v9:City>
          <v9:StateOrProvinceCode>XX</v9:StateOrProvinceCode>
          <v9:PostalCode>XXXXX</v9:PostalCode>
          <v9:CountryCode>XX</v9:CountryCode>
        </v9:Destination>
      </v9:SelectionDetails>
    </v9:TrackRequest>
  </soapenv:Body>
</soapenv:Envelope>
```

### 1.3.4.2 Error Handling

Error handling for non-SOAP operations is different from error handling for SOAP operations. The SOAP specification provides an error handling mechanism that is not present for non-SOAP operations. For a SOAP operation, a fault is returned as a SOAP exception. For a non-SOAP request, the contents of the SOAP fault are returned as an XML document. These SOAP fault documents are returned in situations such as schema validation failures or when operation types are unrecognized. In the following example, a SOAP fault document is returned from a schema validation failure in which the AccountNumber element was incorrectly sent as the AccountNumberx element:

```
<soapenv:Fault xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/">
<faultcode>soapenv:Server</faultcode>
<faultstring>5: Schema validation failed for request.</faultstring>
<detail>
<con:fault xmlns:con="http://www.bea.com/wli/sb/context">
<con:errorCode>5</con:errorCode>
<con:reason>Schema validation failed for request.</con:reason>
<con:details>
<con1:ValidationFailureDetail
xmlns:con1="http://www.bea.com/wli/sb/stages/transform/config">
<con1:message>Expected element 'AccountNumber@http://fedex.com/ws/ship/v8' instead of
'AccountNumberx@http://fedex.com/ws/ship/v8' here in element
ClientDetail@http://fedex.com/ws/ship/v8</con1:message>
<con1:xmlLocation>
<ship:AccountNumberx
xmlns:ship="http://fedex.com/ws/ship/v8">000000000</ship:AccountNumberx>
</con1:xmlLocation>
<con1:message>Expected element 'AccountNumber@http://fedex.com/ws/ship/v1' before the
end of the content in element ClientDetail@http://fedex.com/ws/ship/v8</con1:message>
<con1:xmlLocation>
<ship:ClientDetail xmlns:ship="http://fedex.com/ws/ship/8">
<ship:AccountNumberx>00000000000000000000</ship:AccountNumberx>
<ship:MeterNumber>0000000</ship:MeterNumber>
</ship:ClientDetail>
</con1:xmlLocation>
</con1:ValidationFailureDetail>
</con:details>
<con:location>
<con:node>Validate</con:node>
<con:pipeline>Validate_request</con:pipeline>
<con:stage>ValidateRequest</con:stage>
<con:path>request-pipeline</con:path>
</con:location>
</con:fault>
</detail>
</soapenv:Fault>
```

Each reply should be checked for the Fault element to indicate failure in processing the message.

*Note: Normal error processing still applies; this is an additional error check for incorrect syntax in XML documents.*

Keep in mind that if you use either the SOAP or non-SOAP version of FedEx Web Services, labels are returned as Base64 encoded. To print shipping labels, you must decode labels before sending them to your printer.

### 1.3.4.3 Non-SOAP HTTP POST Example

The following HTTPS POST example is a valid working example, but is not guaranteed to work for all programming languages, applications, and host systems:

```
POST /xml HTTP/1.0
Referer: YourCompanyNameGoesHere
Host: ws.fedex.com
Port: 443
Accept: image/gif, image/jpeg, image/pjpeg, text/plain, text/html, */*
Content-Type: text/xml
```

```
Content-length: %d
Your FedEx Transaction
```

Each line is followed by one new line character except Content-length and the FedEx transaction. Two new line characters follow the Content-length line. The FedEx transaction has no extra characters. The Content-length line should have the length of the FedEx transaction in place of the %d variable.

*Note: Port 443 must be opened for bi-directional communication on your firewall.*

After formatting your non-SOAP transaction and placing it in a HTTP POST request, you will need to open an SSL connection to the FedEx test server and send the request through FedEx by using your SSL connection.

Next, parse the HTTPS response to determine if there were any errors. Examine the HTTP header to determine if any HTTP or Web Server errors were encountered. If you received a 200 status code, parse the reply to determine if there were any processing problems.

### 1.3.5 Visual Basic Project Error

You may receive an error indicating that an element is not set, even after setting it in the code. When you set a Boolean type element to true, you may also need to set the specified element to true.

## 1.4 Implementing FedEx Web Services

Before you begin implementing FedEx Web Services, note the following guidelines:

- FedEx Web Services are designed for use by skilled developers who are familiar with the communication standards SOAP and Web Services Description Language (WSDL).
- Unlike traditional client/server models, such as a web server or web page system, web services do not provide the user with a graphical user interface (GUI). Instead, web services share business logic, data, and processes through a programmatic interface across a network.
- To perform a particular FedEx task such as tracking a package, you need to use a class, module, or function that creates your request, sends it to the FedEx platform, and handles the response.
- FedEx Web Services are designed to support any operating system and coding language. Downloadable sample code is available in Java, C#, VB, .Net and PHP languages from the FedEx Developer Resource Center Technical Resources.
- Transactions submitted to FedEx using FedEx Web Services are required to have a minimum of 128-bit encryption to complete the request.

## 1.5 Understanding the XML Schema

The XML schema defines the messages that you can use to access the FedEx services. You create a request that contains business data and other instructions and you send it to FedEx. FedEx replies with a response that contains the data resulting from the instructions you sent in.

*Note: The schema diagrams are conveniently linked to help you find information and child values.*

The XML schema provides a means for defining the structure, content, and semantics of XML documents.

An XML schema defines:

- Elements and attributes that can appear in a document
- Elements that are child elements
- Order and number of child elements
- Whether an element is empty or can include text
- Data types, default values, and fixed values for elements and attributes

Some important facts about the XML schema:

- Elements that contain sub-elements or carry attributes have complex types.
- Elements that contain numbers (and strings, and dates, etc.), but do not contain any sub-elements, have simple types. Some elements have attributes. Attributes always have simple types.
- Complex types in the instance document, and some of the simple types, are defined in the schema

associated with a FedEx Web Service. Other simple types are defined as part of XML schema's repertoire of built-in simple types.

- XML schema built-in simple types are prefixed by "xs:", which is associated with the XML schema namespace through the declaration `xmlns:xs="http://www.w3.org/2001/XMLSchema"`, displayed in the schema element.
- The same prefix, and the same association, are also part of the names of built-in simple types, such as `xs:string`. This association identifies the elements and simple types as belonging to the vocabulary of the XML schema language, rather than the vocabulary of the schema author.

## 1.5.1 Guide to the XML Schema

The XML schema for each WSDL provides details about the structure, content, and semantics of the request XML document sent to a FedEx Web Service and the XML document returned by that FedEx Web Service.

The top of each service schema includes:

- Schema location and schema file name that ends in an ".xsd" suffix.
- Alphabetical listing of complex types for the documented service.
- Alphabetical listing of schema simple types for the documented service.
- Input or request data type for the documented service.
- Output or reply data type for the documented service.

The remainder of the service schema contains tables of information about each element, complex type, and simple type.

Each table consists of some or all of the following sections: diagram, namespace, children, type, properties, used by, facets, and source.

## 1.6 Implementation Process

Planning your integration and organizing your application data to address your shipping needs can sometimes take more time than the actual implementation of the integration. FedEx Web Services conform to industry standards and are compatible with a comprehensive array of developers' tools. This ensures the fastest time-to-market with maximum flexibility to integrate FedEx transactions and information into your applications. FedEx WSDLs are fully interoperable with any product or developer's tool that also conforms to the WS-I Basic Profile. For details, see [ws-i.org/Profiles/BasicProfile-1.1-2004-08-24](http://ws-i.org/Profiles/BasicProfile-1.1-2004-08-24).

To obtain FedEx Web Services and begin integrating with an application, you need to access documentation, sample code, and sample service requests and replies with the WSDLs from the FedEx Developer Resource Center Technical Resources. Also, obtain a test meter number to engage in real-time online testing in the FedEx hosted test environment.

*Note: Not all services are available outside the U.S.*

### 1.6.1 Testing

FedEx supplies a complete online operating environment with which to test your applications against live FedEx servers. To execute test interactions, you must first include a test account number, test meter number, authentication key, and password in your code. These credentials are provided to registered developers at the FedEx Developer Resource Center at [www.fedex.com/developer](http://www.fedex.com/developer).

Production credentials can be obtained prior to the certification process. Advanced services are not enabled, but standard services are enabled. Refer to [Preproduction Assistance](#) for more information on support from FedEx.

#### 1.6.1.1 Preproduction Assistance

Preproduction assistance is available via the FedEx Web Integrated Solutions Consultation (WISC) team. If you are in the preproduction stages of implementing a FedEx web integrated solution and would like to speak with a FedEx integration consultant who can assist you in understanding FedEx Web Services, contact your FedEx sales executive or technical support at 1.877.339.2774 Monday thru Friday, 7 a.m. to 9 p.m. and Saturday 9 a.m. to 3 p.m. (CST). Both your FedEx sales executive and technical support can request a WISC team member to contact you within 3 business days.

Corporate developers may find that solutions to their needs have already been implemented by a software vendor that is FedEx<sup>®</sup> Compatible. If improved time-to-market, cost containment, or specialized knowledge is needed, corporate development planners may want to review the available third-party solutions. To see a list of the solutions provided by the FedEx<sup>®</sup> Compatible providers, go to the Available FedEx<sup>®</sup> Compatible Solutions page at <http://www.fedex.com/us/compatible/>.

## 1.6.2 Certification

Certification is the process of ensuring that your implementation meets a number of requirements for safe, secure, and effective operation of your solution in the FedEx production environment. Certification requirements differ based on whether you are a corporate or commercial developer, and whether you are implementing using the advanced or standard services. Certification is not required for rating and tracking in production.

## 1.6.3 Go To Production

Once an application has passed certification, the developer must replace the test credentials with the production credentials issued by FedEx. The application connection is then directed to the production servers, and the application is live.

### 1.6.3.1 Requirements for Corporate and Non-Commercial Developers

There are some differences in how support is provided and in the approvals required to go into production that depend on whether you are creating an application for use by your own company or if you are planning to resell your solution to others.

### 1.6.3.2 Requirements and Resources for Corporate Developers

Corporate developers are typically part of a dedicated development team at a single company. This category also includes third-party developers (consultants) hired by the company to work on its behalf. In all cases, the integration will be used by the company itself and will not be resold or distributed outside of its own footprint. In this situation, FedEx can support the customer directly.

**Table 2. Requirements and Resources for Corporate Developers**

Requirements and Resources for Corporate Developers	
Must be accepted into the FedEx <sup>®</sup> Compatible	No
Self-certification of implementations using standard services	Yes
Self-certification of implementations using advanced services	No
Certification assistance	Yes (WISC team)
FedEx supports the customer directly	Yes

#### 1.6.3.2.1 Requirements for Consultants

Consultants developing on behalf of a corporate customer must ensure that their client provides their account information and a signed End User License Agreement (EULA) to FedEx to obtain a production test meter.

#### 1.6.3.2.2 Requirements and Resources for Commercial Developers

Commercial developers create solutions with the intent of distributing and/or reselling them to their customers. Because they are deployed in a variety of situations, commercial integrations generally require a higher order of

“fit and finish.” Commercial developers are responsible for supporting their products for their customers. FedEx has a dedicated team of professionals to help developers commercialize their products and to coordinate the three-way interplay between the developer, the end customer, and FedEx.

If you are a commercial developer interested in becoming a FedEx Compatible provider, go to <http://www.fedex.com/us/compatible/> for more information about the FedEx Compatible Program.

### 1.6.3.3 URL Errors

If a VB.NET or C# project still sends transactions to the test server after changing the URL in the WSDLs to point to production, perform the following:

- Make sure permissions are already activated in the production environment.
- Copy the WSDL files to a different folder.
- Follow the directions on changing the new WSDL files to point to production, as described in the FedEx Developer Resource Center in the “Move to Production” topic.
- Remove existing web services references from your project that point to old WSDLs containing the URLs to the test environment.
- Create new web references that point to the modified WSDLs. Use the same names as the old references.
- Compile and test the project. Your new production credentials should work for standard web services, such as rating or tracking without extra permissions. Advanced web services require permissions to be active before they will work. Old test key values will now return an error message. Test keys will no longer work with production server addresses.

## 2. Rate Services

Use the RateService WSDL to request pre-ship rating information and to determine estimated or courtesy billing quotes. Time in Transit can be returned with the rates if it is specified in the request. Depending on how a rate request is structured, the reply will return in different structures. These structures have two different names.

RateRequest WSDL provides a rate response on a single service.

### 2.1 Rate

*Note: A rate request does not return route or service availability. All rate quotes are estimates only and may differ from the actual invoiced amount.*

### 2.2 Rate Available Services/Rate Shopping

A Rate Available Services request will provide a list of available services from one request. Rates are returned for each service on the list.

*Note: A Rate Available Services request does not return route information, but does check service availability and returns only those services that are actually available.*

#### 2.2.1 Rate Service Details

The Rate and Rate Available Services operations provide a shipping rate quote for a specific service combination depending on the origin and destination information supplied in the request. The following details apply:

- Discount rates are available for all services and origin/destination pairs.
- FedEx list rates are available for FedEx Express<sup>®</sup>, FedEx Ground<sup>®</sup>, FedEx SmartPost<sup>®</sup> and FedEx Freight<sup>®</sup> services. When list rates are requested, both account rates and list rates are returned.

*Note: List rates are not available for all FedEx Freight accounts.*

- FedEx Freight shipper accounts can only request rates from origin at shipper address. FedEx Freight Bill To accounts can request rates from origins other than shipper address.
- Time in transit may be returned with the rates if it is specified in the request.
- The Rate operation returns the rate for the origin and destination by requested service. You will not receive service checking to validate whether that service is actually available for your ship date and origin/destination pair.
- The Rate Available Services operation returns the rate for the origin and destination for all available services.

*Note: Only valid services are returned.*

- Rate and Rate Available Services for FedEx Express shipments support intra-Mexico shipping.
- Rating is available for FedEx SmartPost Shipping. See FedEx SmartPost Request Elements for more details in Chapter 31. SmartPost outbound ship replies will also include rate elements with estimated rates. SmartPost Return shipping label replies will not include rate elements and estimates.
- This quote is an estimate and may differ from the actual invoiced amount.
- Rate shopping, service-specific commitment and rate information may also be specified.

For more detailed information about the services offered by FedEx, see the electronic FedEx Service Guide.

## 2.2.2 Rate Coding Details

When requesting a rate quote:

- Include as much detail as possible about your shipment. The RateService WSDL provides elements to identify your shipment, including shipping option elements. This information is important for calculating the correct shipping costs with surcharges.
- Use the optional RateRequestTypes element to have list rates returned with discount rates. If you choose LIST as the element value, you receive both discount and list rates, in addition to automation rate quotes.
- For Rate (a single service), specify the service to ensure rate data for the service and shipment data input is returned. For Rate Available Services (multiple services returned), do not include the ServiceType. The system will then return a list of services.
- For Rate, specify the carrier by using CarrierCode. For Rate Available Services, specify the carrier to ensure rate data for all services for the carrier and the shipment data combination are returned, or do not specify a CarrierCode to receive all available services from all carriers in the return.
- Use the optional ReturnTransitAndCommit element to include transit time information in the reply. FedEx Express information will include the day and date the package will be delivered, based on the ship date you specified. The FedEx Ground response will describe the number of business days required for the package delivery.
- Use ConsolidationKey to identify the consolidation to which an open shipment should be added after successful creation. You must specify the ConsolidationKey Type, Index, and Date in the RateRequest, in addition to the standard fields, to enable this. The ConsolidationKey fields are the only consolidation-specific fields which must be specified in the RateRequest. The RateReply will return rate and shipment data in the RateReplyDetails array for all CRNs associated with the specified consolidation

*Note: Starting in v16, the "RATED\_\*\*" RateType in the rate reply structure has been removed.*

### 2.2.2.1 RateRequest Elements

Table 11. RateRequest Elements

Element	Required	Description
RateRequest/ReturnTransitAndCommit	Optional	Allows the caller to specify that the transit time and commit data are to be returned in the reply. Valid values include: <ul style="list-style-type: none"><li>• TRUE</li><li>• FALSE</li></ul>
RateRequest/CarrierCodesCarrierCodeType	Optional	Candidate carriers for rate-shopping. This field is only considered if RequestedShipment/ServiceType is omitted.
RateRequest/VariableOptionsServiceOption Type	Optional	Contain zero or more service options whose combinations are to be considered when replying with available services. Specify if Saturday delivery is required. Valid value is SATURDAY_DELIVERY. Note: If you specify SATURDAY_DELIVERY for VariableOptions, you will get both Saturday Delivery options and regular options for all services where Saturday delivery is an option. Do not specify SATURDAY_DELIVERY for SpecialServices or it will only return any applicable Saturday Delivery options.
RateRequest/ConsolidationKey		Uniquely identifies a consolidation, which is a logical container of a collection of shipments.

ConsolidationKey/Type		<p>Specifies the type of consolidation.</p> <p>Valid options are:</p> <ul style="list-style-type: none"> <li>• "INTERNATIONAL_GROUND_DIRECT_DISTRIBUTION"</li> <li>• "INTERNATIONAL_GROUND_DISTRIBUTION"</li> <li>• "TRANSBORDER_DISTRIBUTION"</li> </ul>
ConsolidationKey/Index		Unique consolidation shipment identifier assigned when the consolidation was created.
ConsolidationKey/Date		Specifies the date when the consolidation was created.
RateRequest/RequestedShipment	Required	The shipment for which a rate quote (or rate-shopping comparison) is desired.
RateRequest/requestedShipment/ specialServicesRequested/shipmentDryIceDetail		Shipment-level totals of dry ice data across all packages.
RequestedShipment/ShipTimestamp	Optional	The date format must be YYYY-MM-DDTHH:MM:SS-xx:xx. The time must be in the format: HH:MM:SS using a 24-hour clock. The date and time are separated by the letter T, such as 2009-06-26T17:00:00). The UTC offset indicates the number of hours/minutes, such as xx:xx from UTC, such as 2009-06-26T17:00:00-04:00 is defined as June 26, 2009 5:00 p.m. Eastern Time.
RequestedShipment/DropoffType	Optional	Identifies the method by which the package is to be tendered to FedEx. This element does not dispatch a courier for package pickup.
RequestedShipment/ServiceType	Optional	Identifies the FedEx service to use in shipping the package for a rate request.

RequestedShipment/PackagingType	Required	Identifies the packaging used by the requestor for the package. See PackagingType for list of valid enumerated values.
RequestedShipment/TotalWeight	Optional	Identifies the total weight of the shipment being conveyed to FedEx. This is only applicable to International shipments and should be used on the first package of a multiple piece shipment. This value contains 1 explicit decimal position.
RequestedShipment/TotalInsuredValue	Optional	Total insured amount.
RequestedShipment/PreferredCurrency	Optional	Indicates the currency the caller requests to have used in all returned monetary values (when a choice is possible).
RequestedShipment/Shipper	Required	The descriptive data for the physical location from which the shipment originates.
RequestedShipment/Recipient	Required	The descriptive data for the physical location to which the shipment is destined.
RequestedShipment/RecipientLocationNumber	Optional	A unique identifier for a recipient location.
RequestedShipment/Origin	Optional	Physical starting address for the shipment, if different from shipper's address.
RequestedShipment/SoldTo	Optional	Indicates the party responsible for purchasing the goods shipped from the shipper to the recipient. The sold to party is not necessarily the recipient or the importer of record. The sold to party is relevant when the purchaser, rather than the recipient determines when certain customs regulations apply.
RequestedShipment/ShippingChargesPayment	Optional	Descriptive data indicating the method and means of payment to FedEx for providing shipping services.
SpecialServicesRequested/ShipmentSpecialServiceType	Optional	<p>Identifies the collection of special services requested by the shipper and offered by FedEx. If the shipper requests a special service requiring additional data (such as C.O.D.), the special service type must be present in the SpecialServiceTypes collection, and the supporting detail must be provided in the appropriate sub-object (such as CodDetail). If the customer is not shipping any special services and they include this element, a warning will be returned. To avoid the warning, omit this element. Valid values are:</p> <ul style="list-style-type: none"> <li>• BROKER_SELECT_OPTION</li> <li>• CALL_BEFORE_DELIVERY</li> <li>• COD</li> <li>• CUSTOM_DELIVERY_WINDOW</li> <li>• DANGEROUS_GOODS</li> <li>• DO_NOT_BREAK_DOWN_PALLETS</li> <li>• DO_NOT_STACK_PALLETS</li> <li>• DRY_ICE</li> <li>• EAST_COAST_SPECIAL</li> <li>• ELECTRONIC_TRADE_DOCUMENTS</li> <li>• EMAIL_NOTIFICATION</li> <li>• EXTREME_LENGTH</li> <li>• FOOD</li> <li>• FEDEX_ONE_RATE</li> <li>• FREIGHT_GUARANTEE</li> <li>• FREIGHT_TO_COLLECT</li> <li>• FUTURE_DAY_SHIPMENT</li> <li>• HOLD_AT_LOCATION</li> <li>• HOME_DELIVERY_PREMIUM</li> <li>• INSIDE_DELIVERY</li> </ul>

RequestedShipment/ExpressFreightDetail

Optional

Details specific to an Express freight shipment.

RequestedShipment/FreightShipmentDetail	Optional	Data applicable to shipments using FEDEX_FREIGHT_PRIORITY and FEDEX_FREIGHT_ECONOMY services.
RequestedShipment/DeliveryInstructions	Optional	Used with Ground Home Delivery and Freight.
RequestedShipment/VariableHandlingChargeDetail	Optional	Details about how to calculate variable handling charges at the shipment level.
Requested shipment/ CustomsClearanceDetail	Optional	Information about this package that only applies to an international (export) shipment.
RequestedShipment/CustomsClearanceDetail/ CustomsOptionsDetail/CustomsOptionType		<p>Specifies the reason for a global return, as recognized by Customs.</p> <p>Valid values are:</p> <ul style="list-style-type: none"> <li>• COURTESY_RETURN_LABEL: For the outbound courtesy return label.</li> <li>• EXHIBITION_TRADE_SHOW: For exhibition or trade-show, outbound and inbound.</li> <li>• FAULTY_ITEM: For faulty item being returned, inbound only.</li> <li>• FOLLOWING_REPAIR: For repaired or processed item being sent, outbound only.</li> <li>• FOR_REPAIR: For repair or processing, outbound and inbound.</li> <li>• ITEM_FOR_LOAN: For loan item, outbound and inbound.</li> <li>• OTHER: Other reason, outbound and inbound. This type requires a description.</li> <li>• REJECTED: For rejected merchandise being returned, inbound.</li> <li>• REPLACEMENT: For replacement being sent, outbound only</li> <li>• TRIAL: For use in a trial, outbound and inbound.</li> </ul>
CustomClearanceDetail/DutiesPayment	Optional	Descriptive data indicating the method and means of payment to FedEx for providing shipping services.
CustomsClearanceDetail/Commodities/CustomsValue	Optional	Used to calculate Argentina and Dominican Republic export taxes.

RequestedShipment/PickupDetail	Optional	For use in "process tag" transaction.
PickupDetail/ReadyDateTime	Optional	Specify the time and date the package will be ready for pickup.
PickupDetail/LatestPickupDateTime	Optional	Specify the last possible pickup time and date.
PickupDetail/CourierInstructions	Optional	Specify any courier instructions.
PickupDetail/RequestType	Optional	Specify the request type.
PickupDetail/RequestSource	Optional	Specify the request source.
RequestedShipment/SmartPostDetail	Optional	Details specific to FedEx SmartPost shipments.
RequestedShipment/BlockInsightVisibility	Optional	If true, only the shipper/payor will have visibility of this shipment.
RequestedShipment/ ReturnInstructionsDetail ShippingDocumentFormat/documentFormatOption srequested/ Document formatOptions	No	SUPPRESS_ADDITIONAL_LANGUAGES This value will suppress English language if another language is specified in language code field. (Default is English)
RequestedShipment/SpecialServicesRequested /PendingShipmentDetail/ EmailLabelDetail	No	Describes specific information about the email label shipment. <ul style="list-style-type: none"> <li>• Message: Content of the email message</li> <li>• Recipients: EMailRecipient emailAddress - email address of the recipient role - role type of the recipient optionsRequested localization</li> </ul>
RequestedShipment/SpecialServicesRequested/ PendingShipmentDetail/ProcessingOptions	No	ALLOW_MODIFICATIONS This allows the Email Label originator to specify if the completor can make modifications to editable shipment data.
RequestedShipment/SpecialServicesRequested/ RecommendedDocumentSpecification	No	<ul style="list-style-type: none"> <li>• 'ANTIQUE_STATEMENT_EUROPEAN_UNION'</li> <li>• 'ANTIQUE_STATEMENT_UNITED_STATES'</li> <li>• 'ASSEMBLER_DECLARATION'</li> <li>• 'BEARING_WORKSHEET'</li> <li>• 'FILM_AND_VIDEO_CERTIFICATE'</li> <li>• 'CERTIFICATE_OF_SHIPMENTS_TO_SYRIA'</li> <li>• 'PRINTED_CIRCUIT_BOARD_WORKSHEET'</li> <li>• 'COMMERCIAL_INVOICE_FOR_THE_CARIBBEAN_COMMON_MARKET'</li> <li>• "CONIFEROUS_SOLID_WOOD_PACKAGING_MATERIAL_TO_THE_PEOPLES_REPUBLIC_OF_CHINA"</li> <li>• "DECLARATION_OF_IMPORTED_ELECTRONIC_PRODUCTS_SUBJECT_TO_RADIATION_CONTROL_STANDARD"</li> <li>• "DECLARATION_OF_BIOLOGICAL_STANDARDS"</li> <li>• "ELECTRONIC_INTEGRATED_CIRCUIT_WORKSHEET"</li> <li>• "INTERIM_FOOTWEAR_INVOICE"</li> <li>• "NAFTA_CERTIFICATE_OF_ORIGIN_UNITED_STATES"</li> <li>• "NAFTA_CERTIFICATE_OF_ORIGIN_CANADA_FRENCH"</li> </ul>

RequestedShipment/RateRequestType	Optional	<p>Indicates the type of rates to be returned. Valid values are:</p> <ul style="list-style-type: none"> <li>• LIST – Returns published rates in response.</li> <li>• PREFERRED – Returns rates in currency specified in the PreferredCurrency element.</li> <li>• NONE – Returns account rates in response.</li> </ul> <p><i>Note1: If no value or a value of NONE is included, the RateRequest returns the account (discount) rates by default. If you include the LIST value, the RateRequest will return both list and account rates within the response.</i></p> <p><i>Note2: A preferred currency is available for both account and list rates. Include just the PREFERRED value to receive a preferred currency for an account rate. Include both the PREFERRED and LIST values to receive a preferred currency for both list and account rates within the response. The preferred currency is not returned if the requested currency is already present within the rate response.</i></p>
RequestedShipment/ CustomerSelectedActualRateType	Optional	Specifies the type of rate the customer wants to have used as the actual rate type.
RequestedShipment/EditRequestType	Optional	Specifies whether the customer wishes to have Estimated Duties and Taxes provided with the rate quotation on this shipment. Only applies with shipments moving under international services.
RequestedShipment/PackageCount	Optional	The total number of packages in the entire shipment. The maximum number of packages in one rate request is 100.
RequestedShipment/RequestedPackageLineItems	Optional	One or more package-attribute descriptions, each of which describes an individual package, a group of identical packages, or (for the total-piece-total-weight case) common characteristics of packages in the shipment.

## 2.2.3 Rating for Multiple-Package Shipment

This option is available for FedEx Express U.S. and international multiple-package shipments (MPS), FedEx Ground<sup>®</sup> U.S. and international multiple-package shipments, FedEx Express U.S. C.O.D. and international C.O.D. multiple-package shipments, and FedEx Ground U.S. C.O.D. and international C.O.D. multiple-package shipments.

The maximum number of packages in one rate request is 100.

For more information about MPS, see *14.4 FedEx Express U.S. Multiple-Package Shipments* in *Ship Service*.

*Note: Package level rates are not returned for Express International shipments. This applies to single and multi-package shipments.*

### 2.2.3.1 RateReply Elements

**Table 12. RateReply Elements**

Element	Required	Description
HighestSeverity	Yes	<p>Identifies the highest severity encountered when performing the request. Valid values are:</p> <ul style="list-style-type: none"> <li>• FAILURE</li> <li>• ERROR</li> <li>• WARNING</li> <li>• NOTE</li> <li>• SUCCESS</li> </ul>

Notifications	Yes	<p>Includes the descriptive data detailing the status of a submitted transaction. Includes the severity of the notification, which indicates success or failure or some other information about the request. Valid values are:</p> <ul style="list-style-type: none"> <li>• SUCCESS - Your transaction succeeded with no other applicable information.</li> <li>• NOTE - Additional information that may be of interest to you about your transaction.</li> <li>• WARNING - Additional information that you need to know about your transaction that you may need to take action on.</li> <li>• ERROR - Information about an error that occurred while processing your transaction.</li> <li>• FAILURE - FedEx was unable to process your transaction at this time due to a system failure. Please try again later.</li> </ul>
TransactionDetail	No	Contains the CustomerTransactionID that was sent to the request.
TransactionDetail/CustomerTransactionId	No	Free form text to be echoed back in the reply. Used to match requests and replies.
TransactionDetail/Localization	No	Governs data payload language/translations (contrasted with ClientDetail.localization, which governs Notification.localizedMessage language selection).
Version	Yes	The version of this reply.
RateReplyDetails	No	Each element contains all rate data for a single service. If service was specified in the request, there will be a single entry in this array; if service was omitted in the request, there will be a separate entry in this array for each service being compared.
RateReplyDetails/ReturnedRateType		<p>Valid values:</p> <ul style="list-style-type: none"> <li>• PAYOR_ACCOUNT_PACKAGE</li> <li>• PAYOR_ACCOUNT_SHIPMENT</li> <li>• PAYOR_LIST_PACKAGE</li> <li>• PAYOR_LIST_SHIPMENT</li> <li>• PREFERRED_ACCOUNT_PACKAGE</li> <li>• PREFERRED_ACCOUNT_SHIPMENT</li> <li>• PREFERRED_LIST_PACKAGE</li> <li>• PREFERRED_LAST_SHIPMENT</li> </ul>
CompletedShipmentDetail/ PendingShipmentAccessDetail/Accessor Details	Yes	<p>Provides the ability to return multiple sets of Email label access credentials:</p> <p>-role</p> <ul style="list-style-type: none"> <li>• "SHIPMENT_COMPLETOR"</li> <li>• "SHIPMENT_INITIATOR" <ul style="list-style-type: none"> <li>○ userId</li> <li>○ password</li> <li>○ emailLabelUrl</li> </ul> </li> </ul>

## 2.2.4 FedEx Freight Priority and FedEx Freight Economy

You can obtain list and negotiated rates, in addition to transit time information, for FedEx Freight<sup>®</sup> Priority and FedEx Freight<sup>®</sup> Economy from the Rating WSDL.

### 2.2.4.1 RateRequest Elements

The following request elements are specific to FedEx Freight shipments

**Table 13. FedEx Express Freight RateRequest Elements**

Element	Required	Description
ReturnTransitAndCommit	Optional	Allows the caller to specify that the transit time and commit data are to be returned in the reply. Valid values are: <ul style="list-style-type: none"><li>• TRUE</li><li>• FALSE</li></ul>
CarrierCodes	Optional	Candidate carriers for rate-shopping use case. This field is only considered if RequestedShipment/ServiceType is omitted.
RequestedShipment	Required	The shipment for which a rate quote (or rate-shopping comparison) is desired.
RequestedShipment/ShipTimestamp	Optional	The ship time.
RequestedShipment/DropoffType	Optional	Identifies the method by which the package is to be tendered to FedEx. This element does not dispatch a courier for package pickup.
RequestedShipment/ServiceType	Optional	Identifies the type of service the rate quote is for. Choose either: <ul style="list-style-type: none"><li>• FEDEX_FREIGHT_ECONOMY</li><li>• FEDEX_FREIGHT_PRIORITY</li></ul>
RequestedShipment/PackagingType	Optional	Identifies the packaging used by the requestor for the package. Valid values are: <ul style="list-style-type: none"><li>• YOUR_PACKAGING</li><li>• FEDEX_10KG_BOX</li><li>• FEDEX_25KG_BOX</li><li>• FEDEX_BOX</li><li>• FEDEX_ENVELOPE</li><li>• FEDEX_EXTRA_LARGE_BOX</li><li>• FEDEX_LARGE_BOX</li><li>• FEDEX_MEDIUM_BOX</li><li>• FEDEX_PAK</li><li>• FEDEX_SMALL_BOX</li></ul>

		<ul style="list-style-type: none"> <li>FEDEX_TUBE</li> </ul>
RequestedShipment/TotalWeight	Optional	–
RequestedShipment/TotalInsuredValue	Optional	–
RequestedShipment/PreferredCurrency	Optional	Indicates the currency the caller requests to have used in all returned monetary values, when a choice is possible.
RequestedShipment/Shipper	Required	Descriptive data identifying the party responsible for shipping the package. Shipper and Origin should have the same address.
Shipper/AccountNumber	Optional	The FedEx account number associated with this transaction.
Shipper/Address	Optional	Descriptive data for a physical location. May be used as an actual physical address (place to which one could go), or as a container of "address parts" which should be handled as a unit (such as a city-state-ZIP combination within the U.S.).
Address/StreetLines	Required	Combination of number, street name, and so on. At least one line is required for a valid physical address; empty lines should not be included.
Address/City	Required	Name of city, town, and so on.
Address/StateOrProvinceCode	Required	Identifying abbreviation for U.S. state, Canadian province, etc. Format and presence of this field will vary, depending on country.
Address/PostalCode	Optional	Identification of a region (usually small) for mail/package delivery. Format and presence of this field will vary, depending on country.
Address/CountryCode	Required	The two-letter code used to identify a country.
Address/CountryName	Optional	The fully spelled out name of a country.
RequestedShipment/Recipient	Required	Descriptive data identifying the party receiving the package.
Recipient/Address	Required	Descriptive data identifying the recipient's address which includes: StreetLines, City, StateOrProvinceCode, PostalCode and CountryCode.

RequestedShipment/RecipientLocationNumber	Optional	A unique identifier for a recipient location.
RequestedShipment/Origin	Optional	Physical starting address for the shipment, if different from shipper's address.
RequestedShipment/ShippingChargesPayment	Optional	The descriptive data for the monetary compensation given to FedEx for services rendered to the customer.
ShippingChargesPayment/PaymentType	Optional	Identifies the method of payment for a service.
ShippingChargesPayment/Payor	Optional	Descriptive data identifying the party responsible for payment for a service.
Payor/ResponsibleParty	Optional	The descriptive data for a person or company entity doing business with FedEx.
ResponsibleParty/AccountNumber	Optional	The FedEx account number associated with this transaction.
RequestedShipment/SpecialServicesRequested	Optional	Identifies the special services the caller is requesting with this shipment.
RequestedShipment/FreightShipmentDetail	Required	Includes required shipment data to obtain rates for FedEx Freight shipments.
FreightShipmentDetail/FedExFreightAccountNumber	Optional	Account number used with FedEx Freight services.
FreightShipmentDetail/FedExFreightBillingContactAndAddress	Optional	Billing address used to validate FedEx Freight account on the bill of lading. Required valid values for address are: <ul style="list-style-type: none"> <li>• StreetLines</li> <li>• City</li> <li>• StateOrProvinceCode</li> <li>• PostalCode</li> </ul>
FreightShipmentDetail/Role	Required	Indicates the role of the party submitting the transaction. Valid values are: <ul style="list-style-type: none"> <li>• CONSIGNEE</li> <li>• SHIPPER</li> </ul>
FreightShipmentDetail/LinItem	Optional	Details of the commodities in the shipment.
LinItem/FreightClass	Required	Freight class for this line item. Valid values are: <ul style="list-style-type: none"> <li>• CLASS_050</li> <li>• CLASS_055</li> <li>• CLASS_060</li> </ul>

		<ul style="list-style-type: none"> <li>• CLASS_065</li> <li>• CLASS_070</li> <li>• CLASS_077_5</li> <li>• CLASS_085</li> <li>• CLASS_092_5</li> <li>• CLASS_100</li> <li>• CLASS_110</li> <li>• CLASS_125</li> <li>• CLASS_150</li> <li>• CLASS_175</li> <li>• CLASS_200</li> <li>• CLASS_250</li> <li>• CLASS_300</li> <li>• CLASS_400</li> <li>• CLASS_500</li> </ul>
LineItem/Packaging	Optional	<p>Physical packaging type for this commodity or freight class. Valid values are:</p> <ul style="list-style-type: none"> <li>• BAG</li> <li>• BARREL</li> <li>• BASKET</li> <li>• BOX</li> <li>• BUCKET</li> <li>• BUNDLE</li> <li>• CARTON</li> <li>• CASE</li> <li>• CONTAINER</li> <li>• CRATE</li> <li>• CYLINDER</li> <li>• DRUM</li> <li>• ENVELOPE</li> <li>• HAMPER</li> <li>• OTHER</li> <li>• PAIL</li> <li>• PALLET</li> <li>• PIECE</li> <li>• REEL</li> <li>• ROLL</li> <li>• SKID</li> <li>• TANK</li> <li>• TUBE</li> </ul>
LineItem/Description	Optional	Customer-provided description for this commodity or freight class.
LineItem/Weight	Optional	Weight for this commodity or freight class.
FreightShipmentLineItem/Dimensions	Optional	The dimensions of this package and the unit type used for the measurements. Valid measurements

		are whole numbers greater than zero. Valid values are: <ul style="list-style-type: none"> <li>• Length</li> <li>• Width</li> <li>• Height</li> <li>• Units</li> </ul>
FreightShipmentLineItem/Volume	Optional	Volume (cubic measure) for this commodity or freight class.
RequestedShipment/RateRequestTypes	Optional	Indicates the type of rates to be returned. Valid values are: <ul style="list-style-type: none"> <li>• LIST – Returns published rates in response.</li> <li>• PREFERRED – Returns rates in currency specified in the PreferredCurrency element.</li> <li>• NONE – Returns account rates in response.</li> </ul>
RequestedShipment/PackageCount	Optional	The total number of packages in the entire shipment (even when the shipment spans multiple transactions).
RequestedShipment/RequestedPackageLineItems	Optional	One or more package-attribute descriptions, each of which describes an individual package, a group of identical packages, or (for the total-piece-total-weight case) common characteristics all packages in the shipment.

The following reply elements are specific to FedEx Freight shipments:

**Table 14. FedEx Freight Reply Shipment Elements**

Element	Description
ServiceType	Identifies the type of service used to ship the package. Valid FedEx Freight options are: <ul style="list-style-type: none"> <li>• FEDEX_FREIGHT</li> </ul>
ReplyDetails/FREIGHT_GUARANTEE	Specifies how the freight has been guaranteed for delivery. Valid FedEx Freight values are: <ul style="list-style-type: none"> <li>• GUARANTEED_DATE</li> <li>• GUARANTEED_MORNING</li> <li>• GUARANTEED_TIME</li> </ul>
ReplyDetails/FLATBED_TRAILER	Surcharge for a flatbed trailer.
SurchargeType/INSIDE_PICKUP	Surcharge for inside pickup option.
SurchargeType/INSIDE_DELIVERY	Surcharge for inside delivery option.
SurchargeType/EXHIBITION	Surcharge for option.

SurchargeType/EXTRA_SURFACE_HANDLING_CHARGE	Surcharge for all Intra-India shipments with the XS service option.
SurchargeType/EXTREME_LENGTH	Surcharge for option.
SurchargeType/FLATBED	Surcharge for option.
SurchargeType/FREIGHT_GUARANTEE	Surcharge for option.
SurchargeType/LIFTGATE_DELIVERY	Surcharge for option.
SurchargeType/LIFTGATE_PICKUP	Surcharge for option.
SurchargeType/LIMITED_ACCESS_DELIVERY	Surcharge for option.
SurchargeType/LIMITED_ACCESS_PICKUP	Surcharge for option.

### 2.2.4.3 Rate Surcharge Return

Surcharges are returned in the Rate reply and in the Ship reply as follows:

- Total surcharge
- Total taxes (for Canadian origin shipments)
- Total discounts
- Itemized surcharge

## 2.3 Surcharges and Discounts

Your shipment may incur fees in addition to the base shipping rate depending on the service options you choose. The following are descriptions of those fees that are returned in the rate quote.

**Table 16. Surcharges and Discounts Rate Quote**

Surcharge	Description	Applicable Services
Additional Handling Dimension Surcharge	For FedEx Express, shipment measures greater than 60" in length but equal to or less than 108" in length. For FedEx Ground, shipment measures greater than 60" in length but equal to or less than 108"	FedEx Priority Overnight <sup>®</sup> , FedEx Standard Overnight <sup>®</sup> , FedEx 2Day <sup>®</sup> , FedEx Express Saver <sup>®</sup> , FedEx Ground <sup>®</sup> , FedEx International Ground <sup>®</sup>
Additional Handling Weight Surcharge	For FedEx Ground or FedEx Express, shipment has an actual weight of greater than 70 lbs.	FedEx Priority Overnight, FedEx Standard Overnight, FedEx

		2Day, FedEx Express Saver, FedEx Ground, FedEx International Ground
Additional Handling Packaging Surcharge	<p>For FedEx Express, shipment is not fully encased in an outer shipping container and/or is encased in packing material other than corrugated cardboard.</p> <p>For FedEx Ground, shipment is not fully encased in an outer shipping container and/or is encased in packing material other than corrugated cardboard.</p>	FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx Express Saver, FedEx Ground, FedEx International Ground
Broker Select Option	<p>A fee applies to B13A for Canada Export Shipping shipment if you choose to have FedEx complete the delivery after customs clearance and if your recipient and customs broker are served by different FedEx clearance points. See <i>B13A for Canada Export Shipping</i> in <i>Ship Service</i> for more information.</p>	FedEx International Priority <sup>®</sup> , FedEx International Priority <sup>®</sup> Freight, FedEx International Economy <sup>®</sup> , FedEx International Economy <sup>®</sup> Freight
Courier Pickup Charge	A charge applies when you request a pickup. This charge does not apply if you drop off your package at a FedEx shipping location or if you have regular scheduled pickups.	
Dangerous Goods	FedEx assesses a surcharge on each package containing dangerous-goods materials. For intra-Canada shipments this surcharge is also based on the type of service provided.	FedEx Express, FedEx Priority Overnight, FedEx First Overnight <sup>®</sup> , FedEx First Overnight <sup>®</sup> Freight, FedEx 2Day, FedEx 2Day <sup>®</sup> A.M., FedEx Freight, FedEx International Economy and FedEx International Economy Freight
Declared Value	FedEx liability for each package is limited to \$100USD unless a higher value is declared and paid for. For each package exceeding \$100USD in declared value, an additional amount is charged. FedEx does not provide insurance of any kind.	FedEx Express and FedEx Ground shipments
Delivery Area Surcharge	A delivery area surcharge applies to shipments destined for select U.S. postal codes. (This surcharge does not apply to FedEx Ground Multiweight <sup>®</sup> shipments.) In addition, a delivery area surcharge applies to FedEx Express shipments destined for areas in Alaska that are remote, sparsely populated, or geographically difficult to access.	FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx Express Saver, FedEx Ground, FedEx Home Delivery <sup>®</sup>
Dimensional Weight	For FedEx Express shipments: FedEx may assess shipping charges based on the International Air Transport Association (IATA) volume standard. Dimensional weight is calculated by multiplying the length by width by height of each package in inches and dividing the total by 166 (for shipments within the U.S. and shipments between the U.S. and	FedEx Express and FedEx Ground shipments

	<p>Puerto Rico) or 186 (for international shipments). If the dimensional weight exceeds the actual weight, charges may be assessed based on the dimensional weight. Shipments in FedEx packaging may also be subject to dimensional-weight pricing.</p> <p>For FedEx Ground shipments: Dimensional weight may apply to FedEx Ground packages that are 3 cubic feet (5,184 cubic inches) or larger. Multiply the length by width by height of each package in inches. If the total is 5,184 inches or greater, calculate dimensional weight by dividing by 166 (for shipments within the U.S. and Puerto Rico and for shipments to Canada).</p>	
Duties and Taxes	Duties and taxes, including goods and services tax (GST) and value-added tax (VAT) may be assessed on the contents of the shipment.	FedEx Express International package and freight service
FedEx <sup>®</sup> Collect on Delivery (C.O.D.)	If you request FedEx to obtain payment from the recipient at the time the shipment is delivered, an additional surcharge is applied.	FedEx Express and FedEx Ground shipments
FedEx Ground <sup>®</sup> Electronic C.O.D. (E.C.O.D.)	A charge applies when you direct FedEx to collect payment from your recipient and deposit it directly into your bank account.	FedEx Ground shipments
FedEx <sup>®</sup> Delivery Signature Options	FedEx provides five options when you need a signature upon delivery: Indirect Signature Required, Direct Signature Required, Adult Signature Required, Service Default and No Signature Required. Indirect Signature Required is allowed to U.S. residential addresses only. Direct Signature Required is allowed to U.S. addresses and when shipping via FedEx Ground to Canadian addresses. Adult Signature Required is allowed to U.S. addresses. Depending upon the service associated with the shipment (the default signature option varies per service), the courier will perform the default request for signature collection.	FedEx Express shipments to U.S. addresses and FedEx Ground shipments to U.S. and Canadian addresses
FedEx Email Return Label	A charge applies in addition to shipping charges once the recipient uses the return label. This service is only available for U.S. shipments.	FedEx First Overnight, FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx 2Day A.M., FedEx Ground, FedEx 2Day <sup>®</sup> Freight, FedEx 3Day <sup>®</sup> Freight
FedEx ExpressTag <sup>®</sup>	A charge applies in addition to shipping charges when FedEx picks up the package for return at your recipient's location. This service is only available for intra-U.S. and intra-United Kingdom shipments.	FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day
FedEx	FedEx may provide pickup service to an address other than the shipping location	FedEx Ground (U.S. and Canada)

Ground <sup>®</sup> Alternate Address Pickup	associated with the FedEx Ground account number.	
FedEx Ground <sup>®</sup> Call Tag	A charge applies in addition to shipping charges when FedEx picks up the packages for return at your recipient's location. This service is only available for U.S. shipments.	FedEx Ground, FedEx Home Delivery
FedEx Home Delivery Convenient Delivery Options	You can choose FedEx Home Delivery convenient delivery options: 1) FedEx Date Certain Home Delivery <sup>®</sup> , 2) FedEx Evening Home Delivery <sup>®</sup> , 3) FedEx Appointment Home Delivery <sup>®</sup> .	FedEx Home Delivery
FedEx International Controlled Export (FICE)	A charge applies when you select FICE for shipments moving under a U.S. State Department (DSP) license or under U.S. Drug Enforcement Administration permits 36, 236, and 486. This charge also applies for inbound shipments moving under a transportation and exportation customs form (CF7512) from a foreign trade zone or bonded warehouse.	FedEx International Priority, FedEx International Priority Freight
FedEx <sup>®</sup> Print Return Label	A charge applies in addition to shipping charges once the recipient has used the return label. This service is available for intra-U.S. and international shipments.	FedEx First Overnight, FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx 2Day A.M., FedEx Ground, FedEx 2Day Freight, FedEx 3Day Freight
Inside Delivery/Inside Pickup Charge	When requested, FedEx may move shipments to positions beyond the adjacent loading area.	FedEx Freight
FedEx Freight Special Services	When requested, a surcharge will be applied to the FedEx Freight special services. For a list of these surcharges, see Intra-Canada Express Service.	FedEx Freight
Oversize Charge	<p>FedEx Express: The maximum limits for FedEx Express U.S. packages are 150 lbs. and 119" in length and 165" in length and girth (L+2W+2H). Packages that weigh 150 lbs. or less and exceed 108" in length or 130" in length and girth are considered "oversize" packages. Oversize packages are rated based on the greater of the package's actual rounded weight or dimensional weight.</p> <p>FedEx Ground: A package weighing 150 lbs. or less and measuring greater than 130" in length and girth is classified as an oversize package. The shipping charges for an oversize package are based on the greater of the package's actual rounded weight or its dimensional weight.</p> <p>FedEx Home Delivery: The shipping charge for any package with a dimensional weight of greater than 70 lbs. is the same as a FedEx Ground package of the corresponding</p>	FedEx Ground and FedEx Home Delivery

	dimensional weight being shipped under the same circumstances.	
Residential Surcharge	A residential package surcharge applies to shipments to a home or private residence, including locations where a business is operated from a home.	FedEx Express, FedEx Ground, FedEx International Ground (Canada only), FedEx Freight, FedEx International Premium <sup>®</sup>
Rural Delivery (Alaska and Hawaii)	A surcharge applies for delivery to select rural postal codes in Alaska and Hawaii.	FedEx Ground U.S.
Saturday Delivery/ Saturday Pickup	Saturday Service is available for an additional charge depending on the package service type and origin/destination pair.	FedEx Priority Overnight, FedEx First Overnight Freight, FedEx 2Day, FedEx 2Day A.M., FedEx International Priority, FedEx 1Day <sup>®</sup> Freight, FedEx 2Day Freight
Dry Ice Surcharge	A surcharge will be applied for dry-ice packaging.	FedEx International Priority, FedEx International Economy, and FedEx International Economy Freight services
Fuel Surcharge	<p>The fuel surcharge percentage for FedEx Express services is subject to monthly adjustment based on a rounded average of the U.S. Gulf Coast (USGC) spot price for a gallon of kerosene-type jet fuel.</p> <p>The fuel surcharge percentage for FedEx Ground services is subject to monthly adjustment based on a rounded average of the national U.S. on-highway average price for a gallon of diesel fuel.</p>	FedEx Express, FedEx Freight, FedEx Ground, and FedEx Home Delivery

*Note: For more information about FedEx terms and conditions, including surcharges, go to [fedex.com/us/services/terms/](https://fedex.com/us/services/terms/).*

### 2.3.1 FedEx Discount Programs

The following discount programs are offered by FedEx and are calculated in your rate quote:

**Table 17. FedEx Discount Programs**

Discount Program	Description
FedEx Ground Multiweight	FedEx Ground Multiweight is ideal for multiple-package shipments moving as one unit to the same destination on the same day. This pricing option allows you to combine packages for a multiweight rate. Pricing is based on the combined weight of your packages.
Earned Discounts Pricing Program	The Earned Discounts Pricing Program awards discounts when you meet predetermined revenue levels and/or shipping criteria. You earn additional discounts as you increase shipping activity or due to specific shipment characteristics. Earned discounts are also available for FedEx SmartPost shipping.

*Note: For more information on pricing programs, contact your FedEx account executive.*

## 2.4 FedEx One Rate

As part of the FedEx One Rate offering, new FedEx white packaging is introduced for your use.

### 2.4.1 FedEx One Rate Packaging

The FedEx Packaging Types that are valid/available with the One Rate pricing option are the following:

- FEDEX\_ENVELOPE
- FEDEX\_SMALL\_BOX
- FEDEX\_MEDIUM\_BOX
- FEDEX\_LARGE\_BOX
- FEDEX\_EXTRA\_LARGE\_BOX
- FEDEX\_PAK
- FEDEX\_TUBE

Your own packaging is not available for the One Rate pricing option.

### 2.4.2 New Packaging for Non-One Rate (Traditional Weight-Based)

The new FedEx Packaging Types that are valid/available with the non-One Rate or traditional weight-based pricing option are the following:

- FEDEX\_SMALL\_BOX
- FEDEX\_MEDIUM\_BOX
- FEDEX\_LARGE\_BOX
- FEDEX\_EXTRA\_LARGE\_BOX

### 2.4.3 Maximum Weight for New FedEx Packaging

The maximum allowable weights for the New FedEx Packaging (referenced below) are:

- FEDEX\_SMALL\_BOX
- FEDEX\_MEDIUM\_BOX
- FEDEX\_LARGE\_BOX
- FEDEX\_EXTRA\_LARGE\_BOX

For U.S. domestic traditional weight-based Express shipment: 20 lb/9 kg  
For U.S. outbound traditional weight-based Express shipment: 40 lb/18 kg  
For U.S. domestic Express One Rate shipment: 10 lb/4.5 kg (Envelope)  
For U.S. domestic Express One Rate shipment: 50 lb/22.68 kg (all other)

### 2.4.4 How to Specify One Rate Pricing

**How to Specify FedEx One Rate Pricing Option in the Web Service Transaction:**

1. Specify the "FEDEX\_ONE\_RATE" ShipmentSpecialService.
2. Specify one of the following Packaging Types:

**Table 18. Packaging Types**

Packaging Type	Maximum Weight LB	Maximum Weight KG
FEDEX_SMALL_BOX	50	22.68

FEDEX_MEDIUM_BOX	50	22.68
FEDEX_LARGE_BOX	50	22.68
FEDEX_EXTRA_LARGE_BOX	50	22.68
FEDEX_PAK	50	22.68
FEDEX_TUBE	50	22.68
FEDEX_ENVELOPE	10	4.5

3. Specify a U.S. origin and a U.S. destination.

*Note: Intra-Hawaii shipments are not allowed for One Rate pricing.*

4. Specify one of the following FedEx Express services:

- FIRST\_OVERNIGHT
- PRIORITY\_OVERNIGHT
- STANDARD\_OVERNIGHT
- 2\_DAY
- 2\_DAY\_AM
- EXPRESS\_SAVER

*\*Note: Web Services clients can request both One Rate and weight-based (non-One Rate) rates in a single RateRequest by specifying "FEDEX\_ONE\_RATE" as a ServiceOptionType in the RateRequest.variableOptions .*

## 2.4.5 Express Saver Service and FedEx Packaging

Weight-Based Express Saver Now Available with FedEx Packaging:

Packages can now be shipped using the Express Saver service for a weight-based rate in the following FedEx packaging;

- FEDEX\_SMALL\_BOX
- FEDEX\_MEDIUM\_BOX
- FEDEX\_LARGE\_BOX
- FEDEX\_EXTRA\_LARGE\_BOX
- FEDEX\_TUBE

Previously, only your own packaging was allowed for the Express Saver service.

## 2.5 Samples

Sample code, sample transactions and the specific individual WSDL/XML guide(s) can be downloaded following these steps:

1. Go to the FedEx Developer Resource Center (DRC) at [www.fedex.com/developer](http://www.fedex.com/developer) . Log in with your FedEx.com username and password. If you do not have one, then click on the "Register Now" link. Fill out the form for your DRC username and password.
2. From the left navigation area of the page, click on the link 'FedEx Web Services'.
3. Click on the link 'Move to documentation' under 'Documentation and Downloads'.
4. Click on either the Standard Services tab or the Advanced Services tab on the WSDL Downloads component to find the functionality you are interested in.
5. Use the 'Download code in...' drop-down to select a programming language for the sample code of the

WSDL that has the functionality you need and check the 'Include Documentation (PDF)' check-box under the drop-down in order to download the guide for that WSDL. Then select the gray 'Go' button beside the programming language you selected on the drop-down.

6. In the light gray margin near the name of the functionality (e.g. Ship Service, Rate Service, etc.), there is a link for the WSDL. Click on that link to download the desired WSDL.
7. If you wish to download all of the WSDLs' sample code, sample transactions, and the Developer Guide, at the top of the WSDL component, click the programming language of your choice on the drop-down next to 'DOWNLOAD ALL' and check the 'Include Documentation (PDF)' check-box. Then select the purple 'Download' button.

## 2.6 Error Messages

For error messages, see the *Appendix O: Error Code Messages* section of the *Web Services Developer Guide*.

complexType <b>CommercialInvoice</b>	
diagram	

## CommercialInvoice

CommercialInvoice element is required for electronic upload of CI data. It will serve to create/transmit an Electronic Commercial Invoice through the FedEx Systems. Customers are responsible for printing their own Commercial Invoice. If you would like FedEx to generate a Commercial Invoice and transmit it to Customs, for clearance purposes, you need to specify that in the ShippingDocumentSpecification element. If you would like a copy of the Commercial Invoice that FedEx generated returned to you in reply it needs to be specified in the ETDDetail/RequestedDocumentCopies element. Commercial Invoice support consists of maximum of 99 commodity line items.

### ns1:Comments

type **xs:string**

0..∞

Any comments that need to be communicated about this shipment.

### ns1:FreightCharge

type **ns:Money**

Any freight charges that are associated with this shipment.

### ns1:TaxesOrMiscellaneousChar...

type **ns:Money**

Any taxes or miscellaneous charges (other than Freight charges or Insurance charges) that are associated with this shipment.

### ns1:TaxesOrMiscellaneousChar...

type **ns:TaxesOrMiscellaneousCharg...**

Specifies which kind of charge is being recorded in the preceding field.

### ns1:PackingCosts

type **ns:Money**

Any packing costs that are associated with this shipment.

### ns1:HandlingCosts

type **ns:Money**

Any handling costs that are associated with this shipment.

### ns1:SpecialInstructions

type **xs:string**

Free-form text.

### ns1:DeclarationStatement

type **xs:string**

Free-form text.

### ns1:PaymentTerms

type **xs:string**

Free-form text.

### ns1:Purpose

type **ns:PurposeOfShipmentType**

The reason for the shipment. Notes: SOLD is not a valid purpose for a Proforma Invoice.

### ns1:OriginatorName

type **xs:string**

Name of the International Export that completed the Commercial Invoice different from Sender.

### ns1:TermsOfSale

type **xs:string**

Required for dutiable international Express or Ground shipments. This field is not applicable to an international PIB(document) or a non-document which does not require a Commercial Invoice.

complexType **FreightServiceCenterDetail**

diagram	
---------	--

### FreightServiceCenterDetail

This class describes the relationship between a customer-specified address and the FedEx Freight / FedEx National Freight Service Center that supports that address.

**ns1:InterlineCarrierCode**  
type **xs:string**

Freight Industry standard non-FedEx carrier identification

**ns1:InterlineCarrierName**  
type **xs:string**

The name of the Interline carrier.

**ns1:AdditionalDays**  
type **xs:int**

Additional time it might take at the origin or destination to pickup or deliver the freight. This is usually due to the remoteness of the location. This time is included in the total transit time.

**ns1:LocalService**  
type **ns:ServiceType**

Service branding which may be used for local pickup or delivery, distinct from service used for line-haul of customer's shipment.

**ns1:LocalDistance**  
type **ns:Distance**

Distance between customer address (pickup or delivery) and the supporting Freight / National Freight service center.

**ns1:LocalDuration**  
type **xs:duration**

Time to travel between customer address (pickup or delivery) and the supporting Freight / National Freight service center.

**ns1:LocalServiceScheduling**  
type **ns:FreightServiceSchedulingType**

Specifies when/how the customer can arrange for pickup or delivery.

**ns1:LimitedServiceDays**  
type **ns:DayOfWeekType**

0..∞

Specifies days of operation if localServiceScheduling is LIMITED.

**ns1:GatewayLocationId**  
type **xs:string**

Freight service center that is a gateway on the border of Canada or Mexico.

**ns1:Location**  
type **xs:string**

Alphabetical code identifying a Freight Service Center

**ns1:ContactAndAddress**  
type **ns:ContactAndAddress**

Freight service center Contact and Address

namespace

complexType **HazardousCommodityDescription**

diagram

### HazardousCommodityDescription

Identifies and describes an individual hazardous commodity.

#### ns1:Id

type xs:string

Regulatory identifier for a commodity (e.g. "UN ID" value).

#### ns1:SequenceNumber

type xs:nonNegativeInteger

In conjunction with the regulatory identifier, this field uniquely identifies a specific hazardous materials commodity.

#### ns1:PackingGroup

type ns:HazardousCommodityPackin...

#### ns1:PackingDetails

type ns:HazardousCommodityPackin...

#### ns1:ReportableQuantity

type xs:boolean

#### ns1:ProperShippingName

type xs:string

#### ns1:TechnicalName

type xs:string

#### ns1:Percentage

type xs:decimal

#### ns1:HazardClass

type xs:string

#### ns1:SubsidiaryClasses

type xs:string

0..∞

#### ns1:LabelText

type xs:string

#### ns1:ProcessingOptions

type ns:HazardousCommodityDescri...

0..∞

Indicates any special processing options to be applied to the description of the dangerous goods commodity.

#### ns1:Authorization

type xs:string

Information related to quantity limitations and operator or state variations as may be applicable to the dangerous goods commodity.

complexType **PackageRateDetail**

diagram	
---------	--

**PackageRateDetail**  
 Data for a package's rates, as calculated per a specific rate type.

- ns1:RateType**  
 type *ns:ReturnedRateType*  
 Type used for this specific set of rate data.
- ns1:RatedWeightMethod**  
 type *ns:RatedWeightMethod*  
 Indicates which weight was used.
- ns1:MinimumChargeType**  
 type *ns:MinimumChargeType*  
 INTERNAL FEDEX USE ONLY.
- ns1:BillingWeight**  
 type *ns:Weight*
- ns1:DimWeight**  
 type *ns:Weight*  
 The dimensional weight of the package (if greater than actual).
- ns1:OversizeWeight**  
 type *ns:Weight*  
 The oversize weight of the package (if the package is oversized).
- ns1:BaseCharge**  
 type *ns:Money*  
 The transportation charge only (prior to any discounts applied) for the package.
- ns1:TotalFreightDiscounts**  
 type *ns:Money*  
 The sum of all discounts on this package.
- ns1:NetFreight**  
 type *ns:Money*  
 This package's baseCharge - totalFreightDiscounts.
- ns1:TotalSurcharges**  
 type *ns:Money*  
 The sum of all surcharges on this package.
- ns1:NetFedExCharge**  
 type *ns:Money*  
 This package's netFreight + totalSurcharges (not including totalTaxes).
- ns1:TotalTaxes**  
 type *ns:Money*  
 The sum of all taxes on this package.
- ns1:NetCharge**  
 type *ns:Money*  
 This package's netFreight + totalSurcharges + totalTaxes.
- ns1:TotalRebates**  
 type *ns:Money*
- ns1:FreightDiscounts**  
 type *ns:RateDiscount*  
 0..∞  
 All rate discounts that apply to this package.
- ns1:Rebates**  
 type *ns:Rebate*  
 0..∞  
 All rebates that apply to this package.
- ns1:Surcharges**  
 type *ns:Surcharge*  
 0..∞  
 All surcharges that apply to this package (either because of characteristics of the package itself, or because it is carrying shipments surcharges for the shipment of which it is a part).
- ns1:Taxes**  
 type *ns:Tax*  
 0..∞  
 All taxes applicable (or distributed to) this package.
- ns1:VariableHandlingCharges**  
 type *ns:VariableHandlingCharges*

complexType RequestedPackageLineItem	
diagram	

# RequestedPackageLineItem

This class rationalizes RequestedPackage and RequestedPackageSummary from previous interfaces.

ns1:SequenceNumber

type xs:positiveInteger  
Used only with INDIVIDUAL\_PACKAGE, as a unique identifier of each requested package.

ns1:GroupNumber

type xs:nonNegativeInteger  
Used only with PACKAGE\_GROUPS, as a unique identifier of each group of identical packages.

ns1:GroupPackageCount

type xs:nonNegativeInteger  
Used only with PACKAGE\_GROUPS, as a count of packages within a group of identical packages.

ns1:VariableHandlingChargeDetail

type ns:VariableHandlingChargeDetail

ns1:InsuredValue

type ns:Money  
Specifies the declared value for carriage of the package. The declared value for carriage represents the maximum liability of FedEx in connection with a shipment, including, but not limited to, any loss, damage, delay, mis-delivery, non-delivery, misinformation, any failure to provide information, or mis-delivery of information relating to the package. This field is only used for INDIVIDUAL\_PACKAGES and PACKAGE\_GROUPS. Ignored for PACKAGE\_SUMMARY, in which case totalInsuredValue and packageCount on the shipment will be used to determine this value.

ns1:Weight

type ns:Weight  
Only used for INDIVIDUAL\_PACKAGES and PACKAGE\_GROUPS. Ignored for PACKAGE\_SUMMARY, in which case total weight and packageCount on the shipment will be used to determine this value.

ns1:Dimensions

type ns:Dimensions

ns1:PhysicalPackaging

type ns:PhysicalPackagingType  
Provides additional detail on how the customer has physically packaged the item. As of June 2008, required for packages moving under international and SmartPost services.

ns1:ItemDescription

type xs:string  
Human-readable text describing the package.

ns1:ItemDescriptionForClearance

type xs:string  
Human-readable text describing the contents of the package to be used for clearance purposes.

ns1:CustomerReferences

type ns:CustomerReference  
0..10

ns1:SpecialServicesRequested

type ns:PackageSpecialServicesReq

ns1:ContentRecords

type ns:ContentRecord  
0..∞

Only used for INDIVIDUAL\_PACKAGES and PACKAGE\_GROUPS.

complexType **ShipmentSpecialServicesRequested**

diagram	
---------	--

#### ShipmentSpecialServicesReque...

These special services are available at the shipment level for some or all service types. If the shipper is requesting a special service which requires additional data (such as the COD amount), the shipment special service type must be present in the specialServiceTypes collection, and the supporting detail must be provided in the appropriate sub-object below.

#### ns1:SpecialServiceTypes

type ns:ShipmentSpecialServiceType

0..∞

The types of all special services requested for the enclosing shipment (or other shipment-level transaction).

#### ns1:CodDetail

type ns:CodDetail

#### ns1:DeliveryOnInvoiceAcceptan...

type ns:DeliveryOnInvoiceAcceptanc...

#### ns1:HoldAtLocationDetail

type ns:HoldAtLocationDetail

#### ns1:EMailNotificationDetail

type ns:EMailNotificationDetail

#### ns1:ReturnShipmentDetail

type ns:ReturnShipmentDetail

#### ns1:PendingShipmentDetail

type ns:PendingShipmentDetail

This field should be populated for pending shipments (e.g. e-mail label). It is required by a PENDING\_SHIPMENT special service type.

#### ns1:InternationalControlledExpo...

complexType **ShippingDocumentSpecification**

diagram	
---------	--

### ShippingDocumentSpecification

Contains all data required for additional (non-label) shipping documents to be produced in conjunction with a specific shipment.

#### ns1:ShippingDocumentTypes

type ns:RequestedShippingDocument...

0..∞

Indicates the types of shipping documents requested by the shipper.

#### ns1:CertificateOfOrigin

type ns:CertificateOfOriginDetail

#### ns1:CommercialInvoiceDetail

type ns:CommercialInvoiceDetail

#### ns1:CustomPackageDocumentD...

type ns:CustomDocumentDetail

0..∞

Specifies the production of each package-level custom document (the same specification is used for all packages).

#### ns1:CustomShipmentDocument...

type ns:CustomDocumentDetail

0..∞

Specifies the production of a shipment-level custom document.

#### ns1:ExportDeclarationDetail

type ns:ExportDeclarationDetail

#### ns1:GeneralAgencyAgreementD...

type ns:GeneralAgencyAgreementD...

#### ns1:NaftaCertificateOfOriginDetail

type ns:NaftaCertificateOfOriginDetail

#### ns1:Op900Detail

type ns:Op900Detail

Specifies the production of the OP-900 document for hazardous materials packages.

#### ns1:DangerousGoodsShippersD...

type ns:DangerousGoodsShippersDe...

Specifies the production of the 1421c document for dangerous goods shipment.

#### ns1:FreightAddressLabelDetail

type ns:FreightAddressLabelDetail

Specifies the production of the OP-900 document for hazardous materials.

#### ns1:ReturnInstructionsDetail

type ns:ReturnInstructionsDetail

Specifies the production of the return instructions document.
